875 S. ALLEN ST., MERIDIAN (EAGLE ROAD AND I-84)**

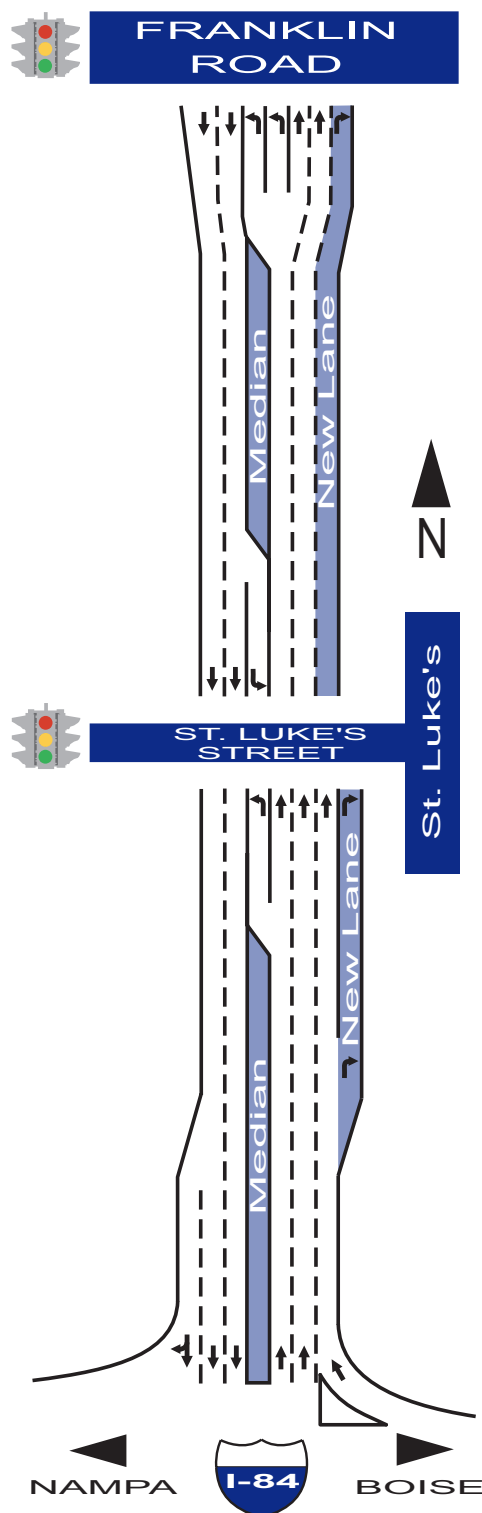

Idaho Transportation Department
P.O. Box 7129
Boise, ID 83707-1129

EAGLE ROAD IMPROVEMENT PROJECT

An Idaho Transportation Department (ITD) project to widen northbound Eagle Road between Interstate 84 and Franklin Road will begin in March 2006. The project will reduce congestion for motorists traveling north on Eagle Road between I-84 and Franklin Road, including those exiting from the interstate.

ITD will host a meeting to answer questions and provide information before construction begins:

Tuesday, March 7, 2006
4 to 7 p.m.
Hampton Inn & Suites, 875 S. Allen St.,
Meridian (off Eagle Road and I-84)

PROJECT FEATURES

- Widen Eagle Road to three lanes between I-84 and Franklin Road. The outside lane will be a right turn only onto eastbound Franklin Road.
- Construct a new dedicated right turn lane from Eagle Road to St. Luke's Street
- Improve safety and traffic flow by building a median barrier from I-84 to Franklin Road that will allow left turns only at signalized intersections
- Construct curb, gutter, sidewalk and storm sewer drainage on the east side of Eagle Road from I-84 to Franklin Road

ADDITIONAL INFORMATION

- Construction will take place primarily at night between 8 p.m. and 6 a.m. The project is scheduled to be completed in summer 2006.
- The northbound Eagle Road widening project is part of the Eagle Road Improvement Project, which will improve traffic flow, enhance vehicle, pedestrian and bicycle safety, and visually enhance the roadway corridor on Eagle Road from I-84 to State Street (Idaho 44).
